4. Configuring PACS Communications

To set up communications to allow Query and Retrieval of DICOM data from PACS, first create a database (see Creating a DICOM database), then open Input/Output.

- Set Input Type to PACS. 1
- Under Remote AET, click Edit. 2
- In the Input/Ouput Administer PACS (AET) list window that opens, click New.
- The window will update showing AET, System, Port, and Description fields. Enter the PACS information into these fields 4 and click Apply. 5

Note that you will need to contact your PACS administrator to obtain the relevant PACS information.

- The window will update and the PACS information will be available in the main window.
- Click Save to close the window. **7**
- The PACS is now configured on the AnalyzePro side.

Note that there may be additional configuration required on the PACS side by your PACS admin.
