

14. Using Enabled Objects to Generate a Combined Object Histogram

- Check the Histogram check box **1** and select Sample Enabled Objects. **2**
- The histogram measurements will be reported **3** and the histogram plotted **4** in a new tab. Right-click to save the histogram log.

The screenshot displays the Neuro_MRI_Axial - Measure software interface. On the left, the 'Sample Type' panel shows 'Enabled Objects' selected (labeled 2). Below it, the 'Stats to View' panel has the 'Histogram' checkbox checked (labeled 1). The main window shows four MRI slices: Axial, Coronal, and Sagittal. At the bottom, a '3D Histogram' table (labeled 3) lists intensity counts for various slices. To the right of the table, a histogram plot (labeled 4) shows a yellow distribution curve on a blue background.
